Decarbonization and Re-use

Hosted by: **KIVI** **DEF** **MAY 28-29, 2024 | KIT AMSTERDAM, NETHERLANDS**

May 28 – 30, 2024      Conference on Foundation Decarbonization and Re-use      1

111 South Wacker Drive  
Downtown Chicago, IL  
1963 vs today

May 28 – 30, 2024      Conference on Foundation Decarbonization and Re-use      2

## The parties involved

May 28 – 30, 2024      Conference on Foundation Decarbonization and Re-use      3

## The parties involved

For the geotechnical engineer foundation reuse may require him to assess the condition and capacity of existing foundation elements, with the associated risks.

May 28 – 30, 2024      Conference on Foundation Decarbonization and Re-use      4

## The parties involved

For the structural engineer it may mean adapting the design to match the existing foundation layout.

May 28 – 30, 2024      Conference on Foundation Decarbonization and Re-use      5

## The parties involved

For the architect it may restrict the design options for the same reason.

May 28 – 30, 2024      Conference on Foundation Decarbonization and Re-use      6

## The parties involved

For the owner it may mean dealing with requests for additional upfront investigations that may result in overall project savings and with members of his project team that feel constrained.

May 28 – 30, 2024      Conference on Foundation Decarbonization and Re-use      7

## The parties involved

For the regulatory body it means that they have to assess an approach that is relatively novel and for which limited guidance is available.

May 28 – 30, 2024      Conference on Foundation Decarbonization and Re-use      8

### The parties involved

For the insurance company it means having to assess risks of a new vs. an old existing foundation.

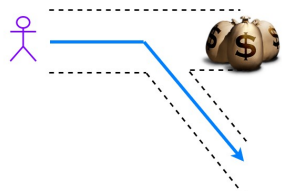

### Let's vote on this proposal

**X X X X X X X**

*"Besides, the existing foundation would have to be supplemented anyhow, so you might as well install an entirely new foundation. You then also know what you have in the ground".*

### Let's vote on this proposal
